## GUIDANCE FOR BERLIN CONTINGENCY PLANNING

1. What appears to be needed to guide Berlin Contingency planners is a tabulation of possible forms of military action for which preparations should be made in the light of the possible developments of the Berlin situation. It is not necessary at this juncture to endorse or approve any one of these courses of action, but all should be available to the national political leaders who must make the critical decisions with regard to Berlin. There follows a tabulation of the possible military actions which should be prepared for execution upon order, and a statement of the purpose of each. The listing is not necessarily chronological.
